

HITRUST Real-Time Compliance Pack

Healthcare Data is Under Attack

Healthcare information including ePHI is ten times more likely to be hacked than credit card or other financial information. Healthcare organizations are beginning to realize that annual assessments or periodic audits are simply not enough to protect this valuable information. They are beginning to see the need for "Continuous Compliance" monitoring.

The HITRUST Compliance Pack Delivers Continuous Compliance Monitoring

The HITRUST Compliance pack is the result of a partnership between industry leaders Silect, The HITRUST Alliance and Microsoft Corp. It leverages prescriptive guidance in the HITRUST Common Security Framework (CSF) to deliver real-time, continuous compliance monitoring, reporting and remediation of your on premise, cloud or hybrid IT infrastructure making your environment more secure and less likely to be breached.

POWERED BY HITRUST CSF

The Health Information Trust Alliance (**HITRUST**) CSF is an information security framework that harmonizes the requirements of existing standards and regulations, including federal (HIPAA, HITECH), third party (PCI, COBIT) and government (NIST, FTC). HITRUST CSF provides organizations with the needed structure, detail and clarity relating to information security tailored to the healthcare industry.

Why HITRUST?

- ✓ Designed for the unique regulatory and business needs of the healthcare industry
- ✓ Adopted by 76% of US Hospitals and 78% of US Health Plans
- ✓ Most widely used approach for 3rd party risk assessments

HITRUST Compliance Monitoring, Reporting and Remediation

The HITRUST Compliance Pack delivers the following capabilities:

- **Continuous Compliance Monitoring**
Real-time assessment of your HITRUST compliance posture leveraging the prescriptive guidance found in the HITRUST CSF
- **Quick Deployment**
Deployment options include on premise using Microsoft System Center or as a service using Azure and Microsoft Operations Management Suite (OMS)
- **Flexible Compliance Reporting**
Dashboards and reports show overall compliance as well as compliance trends with the ability to drill down to view individual endpoints and their compliance state
- **Automated Remediation**
Remediation features efficiently bring non-compliant systems back into a secure and compliant state
- **Works Across Entire IT Infrastructure**
Whether it's monitoring cloud or on premise resources or a combination of both, the HITRUST Compliance Pack can provide an overview of your overall HITRUST compliance state

HITRUST Compliance Summary Dashboard

Microsoft Partners with Silect and HITRUST for Healthcare

“Microsoft realizes that a simplified, proactive approach to regulatory compliance can bring tremendous value to our healthcare customers. We also understand that our customers have requested that we leverage the knowledge of HITRUST to inform how we build effective and tailored healthcare compliance solutions. To deliver on this ask, we are combining the management capabilities of Silect and the advanced operational capabilities of System Center, with the expert knowledge and content of the HITRUST CSF to bring to market a solutions that simplifies the complex issue of healthcare regulatory compliance. We believe that this new combined solution can make this easier, less costly, and provides an efficiently managed and proactive process,” says Michael D. Robinson, Vice President, Microsoft US Health & Life Sciences.

ABOUT HITRUST

The Health Information Trust Alliance (HITRUST) was born out of the belief that information security should be a core pillar of, rather than an obstacle to, the broad adoption of health information systems and exchanges. HITRUST, in collaboration with healthcare, business, technology and information security leaders, has established the HITRUST CSF, a certifiable framework that can be used by any and all organizations that create, access, store or exchange personal health and financial information.

ABOUT SILECT

Silect Software provides products and services to enable advanced Compliance Monitoring, Reporting and Remediation as well as effective deployment and operation of Microsoft System Center. Silect is also a Gold Microsoft Partner with a specialty in Application Development and delivers a range of custom development services for Microsoft Operations Management Suite (OMS), Power BI and System Center. For over 13 years we've been delivering quality software on time, on budget with no surprises.
