

# Silect Compliance Manager

## About Compliance Manager

Silect Compliance Manager monitors your infrastructure to ensure its secure and compliant. Compare your configurations against industry best practices and incorporate your own policies to monitor configuration drift. Built in remediation features make it easy to bring misconfigured systems back into a compliant and secure state.

## Compliance Manager Delivers

- ✓ Security and Compliance Posture Analysis
- ✓ Leverage SCAP Policies, Microsoft SCM Policies and More
- ✓ Easily Develop Custom Policies
- ✓ Remediate Non-compliant Endpoints
- ✓ Configuration Inventory and Application Whitelisting

## Quickly and Easily Assess Your Security and Compliance Posture

### Flexible Compliance Reporting

Compliance Manager can run configuration scans on-demand or it can be setup to scan on a scheduled basis. Compliance dashboards and reports show overall compliance as well as compliance trends with the ability to drill down to view individual endpoints and their compliance state.

### Leverage Industry Best Practices

Compliance Manager supports SCAP policies, Microsoft Security Compliance Manager policies as well as other custom policies to give you complete visibility into your current security and compliance posture. Silect also makes available policies to monitor HITRUST compliance, HIPAA compliance as well as a more general security assessment capability.

### Create Custom Policies

Easily author configuration policies with Compliance Manager's rich policy designer and editor. Author new policies by browsing existing systems settings or use the Golden Master wizard to capture in-use configurations. Compliance Manager supports a wide range of configuration setting types.

### Fast Deployment

Compliance Manager is designed to be up and running quickly. It has a minimal set of requirements and can be setup to run in a variety of simple configurations and environments.

### Remediation

Bringing systems back into a compliant and secure state is easy with the built-in remediation capabilities of Compliance Manager.
