

# MP Authoring and Lifecycle Management Solutions for Microsoft® System Center Operations Manager

## New Version! MP Studio

Silect's MP Studio is a powerful, yet easy-to-use solution that gives you the ability to manage your System Center Operations Manager MPs throughout their lifecycle. MP Studio helps you develop, analyze, optimize and manage all your MPs – saving you significant time and increasing the reliability of your Operations Manager environment.

- ✓ MP Advanced Authoring and Customization
- ✓ MP Analysis and Documentation (now with Automation)
- ✓ MP Testing, Tuning and Override Management (now with copy/move)
- ✓ MP Version Control and Auditing
- ✓ Centralized MP Version Management and Group Deployment

## New Product! MP Author Professional

Silect MP Author Professional makes it easy for IT Professionals and developers to create advanced Management Packs (MPs) for System Center Operations Manager or customize existing MPs. MP Author Professional allows you to extend Operations Manager to quickly and easily manage new workloads. Available at only \$995 per named user.

- ✓ Support for authoring SNMP Management Packs
- ✓ Create advanced Classes and Discoveries
- ✓ Create advanced Monitors and Rules
- ✓ Author Process Monitors
- ✓ Author Tasks, Diagnostics and Recoveries

## New Version! MP Author – FREE

Design and develop new Management Packs (MPs) for Operations Manager or customize existing MPs using an easy-to-use wizard-driven interface, without knowledge of the underlying MP structure or XML development

- ✓ Use a wizard-driven interface to reduce complexity of authoring MPs
- ✓ Create MP rules, monitors, discoveries and classes
- ✓ Author vendor knowledge
- ✓ Create new MPs without requiring access to the management group
- ✓ Optimize using Microsoft's Best Practices Analyzer before implementation
